Field Power

We are using an 800 watt generator and three SOLAR panels to keep the two deep cycle batteries charged.

Instructions for starting and connecting the generator are in the club house.

Several types of connections to the 12 VDC are; Banana jacks, Automotive Accessory jacks and banana to ring adapter

to accommodate those that have alligator clips on their chargers

PLEASE turn off the two 40 AMP circuit breakers and replace the cover before leaving the field.

Some more CASH donations would be appreciated to offset some of my out-of-pocket expenses. Jim Corbett
